RIVER-BORNE TRAFFIC OF THE LOWER PROVINCES OF BENGAL

AND ON THE INLAND TRADE OF CALCUTTA

AND ON THE TRADE OF CHITTAGONG PORT,

FOR THE YEAR 1898-99.

CHAPTER I.

EXPLANATION OF THE SYSTEM OF REGISTRATION.

THIS report, the twenty-third of its kind published by the Government of Bengal, deals (1) with the trade registered on the rivers and canals of the Lower Provinces of Bengal, (2) with the inland trade of Calcutta, and (3) with the trade, inland and sea-borne, of the Chittagong Port during the official year 1898-99. It is based on the returns and reports noted on the margin. The system of registering the traffic was the same as in the previous year. Statistics relative to the rail-borne traffic of these Provinces have, since 1884-85, been reviewed in a separate report.

1. Fortnightly returns of traffic carried by country boats along the Bhagirathi, the Jalangi, and the Mathabhanga, commonly called the Nadia rivers.
2. Fortnightly returns of traffic carried by country boats on the Midnapore, Hijili, and Orissa Canals, and the Orissa Coast Canal.
3. Fortnightly returns of traffic carried to and from Calcutta by country boats and carts registered at a cordon of 25 stations around Calcutta and Howrah.
4. Monthly statements of traffic carried along the Brahmaputra and Meghna rivers by the steamers of the India General Steam Navigation Company and the Rivers Steam Naigavtion Company.
5. Monthly statements of traffic carried along the Ganges, the Bhagirathi, the Jalangi, and the Hooghly rivers to and from Calcutta by the steamers of the India General Steam Navigation Company, the Calcutta Steam Navigation Company, and the Rivers Steam Navigation Company. Also quarterly statements of internal traffic between Bengal and Bihar carried by the steamers of the first named Company.
6. Quarterly statements of traffic carried by country boats between Bengal and Assam registered at Bhairab Bazar on the Meghna river and at Dhubri on the Brahmaputra.
7. Monthly and quarterly returns of traffic carried to and from Calcutta by the East Indian Railway, the Eastern Bengal State Railway, the Assam-Bengal Railway and the Bengal-Nagpur Railway.
8. Annual statements of the sea-borne trade of Calcutta.
9. Annual statements of the inland and sea-borne trade of Chittagong.
10. Quarterly statements showing the wholesale prices per maund of all articles of trade received from four selected marts; and also from the Collector of Customs, Calcutta, the Board of Revenue, Lower Provinces, and from the principal Indigo and Tea Brokers in Calcutta.
11. Annual report by the Board of Revenue, Lower Provinces, on the administration of the Salt Department.
12. Special report submitted to Government by the local officers on the condition of the trade on the Nadia rivers, the Calcutta, Midnapore, Hijili, and Orissa Canals, and the Orissa Coast Canal.

Trade along the chief routes.

2. The statistics furnished in Chapters II to VII of this report include—

The boat traffic registered on the Nadia rivers.
The steamer traffic on the Ganges, Bhagirathi, Jalangi, and Hooghly rivers, as well as along the Midnapore Canal and the Orissa Coast Canal.
The boat traffic registered on the Midnapore and Hijili Canals.
The boat traffic registered on the Orissa Canals and Orissa Coast Canal.
The boat traffic registered on the Calcutta Canals.
The boat and steamer traffic on the Brahmaputra and Meghna rivers, internal and external (with Assam).

3. The boat traffic between Bengal and Assam on the Brahmaputra and Meghna rivers is registered at Bhairab Bazar and Dhubri under arrangements made by the Assam Administration. The steamer traffic along those rivers between Bengal and Assam is in the hands of the India General and Rivers Steam Navigation Companies. The steamers of these Companies also ply on the Hooghly and the Ganges between Calcutta and the marts in the districts named in the margin, and the Calcutta Steam Navigation Company runs steamers between Calcutta and marts in the Burdwan, Midnapore, Hooghly, Nadia, Murshidabad, and Balasore districts. The steamer service of the India General Steam Navigation Company between Calcutta and the North-Western Provinces, which was discontinued at the close of 1888-89, was re-opened in July 1896, and the statistics of the traffic carried between Calcutta and Ghazipur have been compiled and included in the trade returns of Bengal. In connection with the registration of the inter-provincial river-borne traffic between Bengal and the North-Western Provinces, which was started from April 1898 under the orders of the Director-General of Statistics in order to supplement the rail-borne trade of the two Provinces, the India General Steam Navigation Company, who receive a subsidy from Government for the supply of statistics of the trade carried by their steamers, have, besides the returns relating to traffic between Bengal and those provinces, furnished statements showing the internal trade of the Lower Provinces between Bengal and Bihar. The figures of this latter traffic have been incorporated in Chapter III of this report. All the above Companies have furnished Government with statistics of the traffic carried by them; and for this courtesy the acknowledgments of the Lieutenant-Governor are again due to the Agents of the Companies.

4. The inland trade of Calcutta and the inland and sea-borne trade of the port of Chittagong are described separately in Chapters VIII and IX. The boat and road traffic of Calcutta is registered at 25 stations, placed on the Hooghly and on the canals and roads leading into Calcutta and its Suburbs and into Howrah, so as to form a cordon round the capital. For Chittagong the returns exhibit the sea-borne trade, foreign and coasting, including that carried by country boats.

Classification of commodities.

5. During the year under report, the following changes were made in the classification of articles of trade, under instructions from the Director-General of Statistics:—

2. As compared with 1897-98, the increase in the gross weight of goods registered was 7·7 per cent., but the past year's figures were still 3·2 per cent. below those for 1896-97. The largest falling off occurred on the Jalangi route, and was due to various causes; for instance, owing to the dulness of the jute market only a small number of boats came from Malda and Raiganj *viâ* the Jalangi, while the Assam-Bihar Railway continued to attract to it the jute and tobacco traffic of Dalalganj in the Purnea district, which hitherto used to pass *viâ* the Jalangi. Again, the entrance of the Mathabhanga being better, the rice boats from the Rajshahi and Dinajpur districts passed through that river, while none of the Bihar boats came down the Jalangi, except a few stray ones which had failed to enter the Bhagirathi. The plague also greatly interfered with the trade of the past year, as the following extract from the Report of the Toll Collector of the Mathabhanga river show :—

"There can be no doubt too as to the effect produced on the traffic by the appearance of the plague in Calcutta; for in April 1898, when the intrusion of the pest became known to the people of these parts, several consignments of cereals that had all but arrived at their destination were brought back by the consignors to the places of shipment. And so late as in September last a very pronounced reluctance to proceed on their journey was displayed by the *challanees* and crew of boats from Northern Bengal and Assam. These refused to move until they had been re-assured that they had nothing to fear. The extent to which this feeling of alarm had taken hold on the men may be gauged from the fact that, leaving their boats here, the majority of the *manjhis* went down to Calcutta to ascertain for themselves the actual condition of affairs."

3. Last year the condition of the Bhagirathi river was satisfactory, as the following remarks of the Collector of Tolls show :—

"The traffic was steadily decreasing for some years past, but during the year under reference there was an increase over the collections of the previous year. This is due to the crops being good and abundant all over, and the river being navigable for a longer period than in the previous year."

The Collector of Tolls, Jalangi river, states:—

"The outlook for any improvement in the traffic in these rivers is, in my opinion, far from encouraging. The gradual silting up of the entrance of the Jalangi and the increased popularity of the several railways connecting all the centres of trade with Calcutta, are conveying away large proportions of the river traffic, and when the proposed Kathiwar-Ranaghat line, now under survey, is constructed, the local traffic, now the chief source of income, will gradually diminish."

The Collector of Tolls, Mathabhanga river, states:—

"Soon after the rivers began to rise there was a great change for the better in the entrance of the Mathabhanga from the Padma, and so strong was the draw into it that it was expected not only that a navigable channel would be obtainable to a much later date than usual, but also that the traffic would improve. Early in October, however, the bar that has for several years past given trouble, once again showed signs of silting up which led to the diversion of traffic to the Sundarbans route. This was somewhat unfortunate as it happened at a time when confidence in this route, the shortest and most popular waterway to Calcutta from Northern Bengal, was about to be restored."

4. The subjoined statements show the quantities of all the important articles of traffic carried by country boats along the Nadia rivers during the past three years:—

5. The total traffic carried down stream showed an increase of 5,16,433 maunds in comparison with 1897-98 and of 1,13,371 maunds when compared with 1896-97. The following statement shows the fluctuations in the principal staples registered during the past year as compared with 1897-98:—

6. *Jute, raw.*—The decrease was due to a small crop. As compared with the preceding year, the largest falling off occurred in the consignments from Nadia (62,701 maunds as against 1,77,450 maunds), Purnea (56,505 maunds as against 94,535 maunds), Malda (25,124 maunds as against 73,714 maunds), and from Murshidabad (44,601 maunds as against 68,303 maunds).

7. *Food-grains.*—Owing to abundant harvests, the food-grain traffic showed a great revival, the total quantity carried down stream amounting to 11,15,837 maunds as compared with 6,47,210 maunds in 1897-98; but the past year's figures are still 1,84,075 maunds below those for 1896-97. There was a considerable increase in the exports of wheat from the Murshidabad district which supplied 52,317 maunds as against only 13,347 maunds in the preceding year. From Nadia, shipments rose from 2,455 maunds to 44,379 maunds, and those from Malda from 1,626 maunds to 17,923 maunds. In the case of gram and pulse, there was an improvement in the supply drawn from almost all the exporting districts, notably from Murshidabad and Nadia, which showed an increase of 69,788 maunds and 64,516 maunds respectively, and from Rajshahi (17,587 maunds), Monghyr (9,284 maunds), Patna (9,283 maunds), Malda (8,178 maunds) and Burdwan (8,022 maunds). The great bulk of the rice registered was supplied from the Western Bengal block, the chief contributors being Burdwan (1,06,692 maunds as against 93,809 maunds) and Murshidabad (43,339 maunds as against 18,225 maunds). The consignments from Dinajpur aggregated 75,662 maunds as against nil in 1897-98. The fluctuations under miscellaneous spring and rain crops were for the most part due to larger despatches from Murshidabad (51,716 maunds), Malda (6,210 maunds) and Patna (6,040 maunds) as against a decrease of 53,513 maunds in the exports from Nadia.

The following abstracts furnish separately for each article, the details of the food-grain traffic, classified by trade blocks, during the past year as compared with the figures for the previous year:—

8. *Oilseeds.*—There has been a great improvement under this head over the trade of the preceding two years, the figures for the past year being 7,47,145 maunds as against 4,72,008 maunds and 3,67,049 maunds in 1897-98 and 1896-97, respectively. In the case of linseed, the total increase was 2,68,272 maunds in comparison with the previous year. Almost all the supplying districts contributed to the increase, specially Patna (1,50,743 maunds as against only 400 maunds in 1897-98), Nadia (1,38,473 maunds as against 84,094 maunds) and Murshidabad (72,860 maunds as against 38,612 maunds). The traffic under mustard seed, however, showed a decline, namely, 1,79,856 maunds, as against 2,13,337 maunds in 1897-98, but the figures for the past year exceeded those for 1896-97 by 40,748 maunds. The largest decrease, amounting to 20,993 maunds, occurred in the shipments from Darbhanga. The other districts, in which there was a comparatively large falling off, are Purnea (14,297 maunds) and Bhagalpur (8,784 maunds).

The different trade blocks from which the supply of linseed and mustard seed during the past two years was received are shown in the subjoined statements:—

9. The past year's traffic showed a further decline of 1,15,699 maunds as compared with 1897-98, and of 2,54,891 maunds as compared with 1896-97. The chief fluctuations

Up-stream traffic.

12. *Salt.*—The total quantity of salt carried up-stream amounted to 2,71,667 maunds, as against 3,13,346 maunds in 1897-98 and 2,64,181 maunds in 1896-97. The details of this traffic will be found in the Calcutta section of this report.

3. As compared with 1896-97, the aggregate quantity carried during 1898-99 showed an increase of over half a lakh of maunds, but in comparison with 1897-98 the figures showed a heavy falling off of over 6 lakhs of maunds; the decrease was chiefly due to a smaller demand for railway materials owing to the completion of the Bengal-Nagpur Railway, for which only 72,000 maunds of materials were carried last year, as against over 5 lakhs of maunds in 1897-98. In the annual report of the Toll Collector of the Mathabhanga river for the past year it is stated that the steamer service continued to carry a large share of the merchandise, which a few years back was conveyed by country boats.

" The following statement shows the principal articles of commerce imported into and exported from, Calcutta during the past three years:—

4. The import traffic of the past year was equal to that of 1896-97, but in comparison with 1897-98 it showed a falling off of 6·57 per cent. The chief fluctuations are a decrease under rice and paddy as against a corresponding increase under linseed; the other articles contributing to the decrease in comparison with 1897-98 were coal and coke, refined sugar, and "unspecified" articles. The imports from the Bihar block rose by 2 lakhs of maunds, while those from the Western Bengal block showed a falling off of 3 lakhs of maunds. The chief staples with their quantities, as compared with the preceding year, are given in the subjoined statement :—

The largest falling off occurred in the imports of rice and paddy from the Midnapore district, the supplies from which declined by nearly 3 lakhs of maunds owing to the damage caused to the crops by floods and subsequently by grasshoppers.

6. *Oilseeds.*—The following statement shows the different districts from which linseed and mustard seed were shipped for Calcutta during the past two years:—

The district of Patna tops the others with an increase of over one lakh of maunds under linseed, the other principal districts contributing to the advance being Monghyr and Saran. Under mustard seed, increases occurred everywhere except in the consignments from Nadia and Murshidabad.

Exports.

7. The export trade showed a decrease of 35·84 per cent. as compared with 1897-98, and of 8·03 per cent. as compared with 1896-97. The largest decrease occurred in the quantities of railway materials carried to Kolaghat from the Western Bengal block as already explained in paragraph 3. The principal articles registered during the past year, with their fluctuations, as compared with 1897-98, are given below:—

Last year the aggregate quantity carried both ways was 19·25 per cent. below the figures for 1897-98 and 28 56 per cent. below those for 1896-97. Regarding the condition of the traffic along the Midnapore Canal, the Executive Engineer, Cossye Division, makes the following remarks:—

"There was an all round depression of trade during the year under review. The number of boats was less than what plied in any one of the preceding fourteen years, being 36,257 as against 44,480, the average of the previous ten years, and the tonnage of boats was less than any previous years excepting 1885-86 and 1893-94, being 375,879 as against 437,783, the average of the previous ten years The total tollage receipts of the year were Rs. 1,03,084 as against an average of Rs. 1,32,680 for the previous ten years

"The decrease of exports was due mainly to the damage caused by the floods destroying the rice crops. At the end of the rice season damage was caused by grasshoppers to the rice plants, which still further reduced the crops.

"The plague scare in Calcutta may have had some effect on the traffic, as the Calcutta merchants for a time wanted cash payment for goods."

The condition of the trade on the Hijili Canal also was not satisfactory. The Executive Engineer, Balasore Division, observes as follows: —

"The whole length of the Hijili Canal was opened to traffic throughout the year. The toll for the year was Rs. 72,573 as against Rs. 91,770 of the previous year. The count of boats using the river routes instead of Hijili Tidal Canal stands as below. Three thousand six hundred and seventy-four boats, against 6,455 of the previous year, passed up and down the Rasalpur river, representing approximately 13,98,800 maunds, against 28,07,540 maunds of the previous year. This tonnage would have realized Rs. 25,353 in tolls if the boats had used the Hijili Tidal Canal instead of the river route. On the Huldi river 1,796 boats passed, against 2,682 of the previous year, representing 9,21,540 maunds, against 13,07,400 maunds of 1897-98, *i.e.*, Rs. 6,336 would have been realized if the boats had passed through Range I of the Hijili Tidal Canal.

"The decrease is due chiefly to a smaller export of rice by the canal on account of poor crops in the districts of Midnapore and Balasore, and partially to the opening of the railway to traffic from Calcutta to Cuttack *viâ* Balasore during the present year.

"The Calcutta Steam Navigation Company maintained their by-weekly service from Gewankhali to Nulkool, and the India General Steam Navigation Company's steamers ran in connection from Balasore *viâ* Nulkool to Cuttack."

2. The abstract below shows the total import and export traffic, district by district, carried along those canals during the past three years:—

3. The total quantity carried down stream during the past year was 9,66,141 maunds and 15,91,822 maunds below the figures of 1897-98 and 1896-97, respectively. The chief staples and the fluctuations in them as compared with the preceding year are given in the subjoined statement:—

4. Rice and paddy form the main articles of trade along these canals. The chief feature in the past year's traffic was a decrease of 3,44,421 maunds of rice and 3,82,135 maunds of paddy in the exports from the Midnapore district as compared with 1897-98, and of 7,50,966 maunds and 7,12,598 maunds respectively in comparison with 1896-97, as will be seen from the statement below:—

5. While the upward traffic of the past year showed an increase of 43,567 maunds in comparison with 1897-98, it was equal to that of 1896-97. The chief articles, with their fluctuations, carried up-stream during the year 1898-99 as compared with the totals of the previous year were as follows:—

Upward traffic.

		Total traffic registered in 1898-99.	Variations as compared with 1897-98. Increase.	Decrease.

As usual, the chief source of supply for all goods was Calcutta, and the chief consuming districts were Midnapore and Hooghly. Concerning the large increase under rice in the husk, the Executive Engineer, Cossye Division, states as follows:—

"The increase in the import of 'Other food-grains' was wholly in paddy brought from Calcutta to the Ghatal subdivision of this district and the neighbouring tracts, which suffered greatly from the floods of June last."

The decrease under coal and coke is attributed to the Bengal-Nagpur Railway extensions approaching completion.

CHAPTER V.

BOAT TRAFFIC ON THE ORISSA CANALS.

The total quantity and value of the trade carried by country boats on the Orissa Canals during the past three years are shown in the following table :—

The total quantity carried during the past year was 3,18,000 maunds and 1,98,068 maunds below the figures for 1897-98 and 1896-97, respectively. The Executive Engineer, Balasore Division, states that the main feature of the trade during the past year was the falling off, due to the opening of the Railway; the poor crops in Midnapore and Balasore also contributed to the decrease shown above.

2. The distribution of the trade, district by district, during the past three years, was as follows :—

3. The falling off in the down traffic was 30·69 per cent. and 37·18 per cent., as compared with the figures for 1897-98 and 1896-97, respectively. The fluctuations in the principal articles carried down-stream during the past two years, are shown in the following statement :—

CHAPTER VI.

BOAT TRAFFIC ON THE CALCUTTA CANALS.

The following statement shows the total quantity and value of the import and export trade of Calcutta carried by country boats along the Calcutta canals during the past three years:—

	Quantity.			Value.

Boats which have been loaded or are to be unloaded at the Port Commissioners' wharves on the Hooghly are registered by the Port Commissioners, and not at the canal stations.

2. The gross quantity registered during the past year was 7·4 per cent. less than in the previous year, and 10·7 per cent. below the total of 1896-97, the decrease being both in the import and export traffic. The causes of these fluctuations are explained by the Toll-collector of the Calcutta canals as follows:—

"The toll-collections amount to Rs. 3,66,781, against Rs. 4,02,938, or a falling off of Rs. 36,157 for 1898-99. This decrease is on firewood, jute, lime, salt, kerosine oil, coal and empty boats, but chiefly on jute, which accounts for Rs. 30,598 due to small crops. The plague-scare from April to September also seriously affected the canal traffic under all heads. The canal seemed quite deserted, and nearly all the *aruthdars* left, having closed their *aruths*. There was an increase of Rs. 20,147 on rice. The railways and inland steam navigation companies are yearly cutting more into the country boat traffic. The number of flats are yearly increasing. Mahajans can get their cargoes by this way quicker, and insurance charges are of course much less. The figures in the margin will show how this traffic is developing. The large increase during the last two years is due chiefly to the establishment of a daily service of steamers between Calcutta and Cachar."

1895-96	1,482
1896-97	1,336
1897-98	2,497

3. The total quantity of merchandise imported during the past year showed a decrease of 4·8 per cent. as compared with 1897-98, and of 10·9 per cent. in comparison with 1896-97. The chief fluctuations in the past year's traffic as compared with the figures for 1897-98 are noted below:—

In the import trade, the largest falling off (3,17,891 maunds), is observable under mustard seed, and was due to the short outturn in the Brahmaputra valley; coal and coke showed an enormous advance of 13,53,416 maunds, owing to a larger output, raw jute of 22,495 maunds, and tea, 21,734 maunds. In the exports to Assam, the only items which showed an increase were refined sugar (10,314 maunds) and unrefined sugar (8,718 maunds). On the other hand, there were decreases under coal (2,00,819 maunds), metals (78,245 maunds), and salt (16,168 maunds).

The total imports into Calcutta of the articles enumerated in the foregoing statement represent 44·3 per cent. of the entire inland import traffic of Calcutta during 1898-99, against 41·9 per cent. in the previous year. The articles which showed the largest increase were food-grains, linseed, tea (Indian), raw cotton, gunny-bags and refined sugar, while those which showed the largest decline were raw jute, mustard seed, tobacco, hides and unrefined sugar.

Compared with 1897-98, the largest decrease occurred in the consignments from the North-Western Provinces and Oudh, viz., 52,637 maunds; the supplies from Cawnpur declined by 44,002 maunds, from Agra by 42,640 maunds,

from Bulandshahr by 4,862 maunds, and from Eta by 4,339 maunds, against an increase in the despatches from Etawah and Alighar of 31,070 maunds and 16,611 maunds, respectively. The decrease under Bengal was due to smaller supplies received from Dacca viz., 26,176 maunds, from Chittagong, 23,885 maunds, and from Rangpur, 16,039 maunds. The decrease shown against the Punjab was 21,929 maunds, and was chiefly due to the imports from Umballa and Delhi having fallen off by 7,815 maunds and 3,919 maunds, respectively. The improvement in the imports from Madras was 65,257 maunds, from Berar, 56,598 maunds, from Burma, 48,802 maunds, and from Bombay, 7,817 maunds.

The exports of raw cotton from Calcutta to foreign ports have fluctuated greatly in the past year. The falling off of 38·7 per cent. to the United Kingdom and of 60·4 per cent. to France is explained by larger shipments to those countries of American cotton which is preferred by them, and was, during the past year, unprecedentedly cheap. The shipments to Belgium, which showed an increase of 281·5 per cent., may have been partly for France. The increase of 263 per cent. to Japan is marked, and a portion of the cotton shipped to Hong-Kong was probably for that country also.

The fluctuations in the foreign trade are explained by the Collector of Customs, Calcutta, as follows:—

"The figures for the total imports of *Twist and Yarn* in 1898-99 show a marked decrease of 1,727,313 lbs. on those of 1897-98, which were, however, the highest tabulated. The abnormally heavy imports of 1897-98, in the train of a very distressful period in India, proved to be in excess of requirements, and resulted in a considerable decline in the past year. As compared with the figures for 1896-97, however, a satisfactory advance of a quarter of a million pounds is still apparent, and, indeed, the quantity imported is greater than in any year of the last decade except 1890-91 and 1897-98. The decrease in *Dyed Yarns* was about a third of a million pounds, and in *Grey and White Yarns* about 1¼ million, compared with the heavy imports of 1897-98, 40*s*. *Mule* decreased during the year by one million pounds, but nevertheless came in much larger quantity than in the years previous to that—a feature which may be looked upon as satisfactory for the Lancashire staple industry."

Indian twist and yarn.

11. The imports by sea of Indian cotton twist and yarn represent, for the most part, the produce of the mills in Bombay, while the supplies carried by other routes were derived from the mills in the vicinity of Calcutta. The remarks made under this head by the Collector of Customs, Calcutta, are as follows:—

"The figures for the imports of *Cotton Twist and Yarn* of Indian manufacture have been steadily advancing, with the exception of a slight check in the famine year 1896-97, and are again the highest tabulated. There is a steady demand for certain counts, chiefly of 20*s*. to 24*s*., but, as in the past year, the increase is also partly due to the diversion to Calcutta of a portion of the stock of *Yarn* spun for the China market, owing to the advance that is being made by that country in supplying its own wants."

16. The foregoing statement gives declared values in all cases, except in respect of piece-goods carried by railway and by inland steamers, which are registered by weight only. In the case of imports by rail, the value of goods has been calculated according to the value rates of the different exporting provinces. Under the other heads values have been calculated at the rate of Rs. 63¼ per maund, which has been taken to represent the average value of a maund of European piece-goods in Bengal in 1898-99.

Imports.

17. The figures given above against the imports by sea represent the total clearances for consumption from shipboard and from bond. The supplies during the past three years were obtained from the different ports mentioned in the table below:—

The Customs Resolution of the Government of Bengal for 1898-99 contains the following remarks in respect of the imports of cotton-goods from foreign ports:—

"The total imports of cotton goods, including twist and yarn, exceeded those of the year 1897-98 by about two crores of rupees in value, or by 14 per cent. The heavy fall in the value of imports under twist and yarn is attributed to reduced price of the raw material, to the overstocking of the market in consequence of enormous receipts in 1897-98, and to some improvement in the purchasing power of the rupee."

Exports.

18. The total export trade showed an increase of 4 per cent. in comparison with 1897-98, but a decrease of 5 per cent. as compared with 1896-97. The destination of piece-goods despatched from Calcutta, province by province, during the past three years, is compared below with the figures of the preceding two years:—

Comparison of imports with exports.

19. With an addition of 25 per cent. to the total clearances from ship board and from bond on account of under-statement of values, insurance, landing charges, &c., &c., the total value of the past year's import traffic, both internal and seaborne, would amount to Rs. 16,88,94,300. Of this amount, the

value of piece-goods exported during the year was Rs. 12,69,73,342, as shown above. The value of the excess of imports over exports, therefore, amounted to Rs. 4,18,20,958, as against Rs. 2,22,45,935 in 1897-98 and Rs. 5,01,64,397 in 1896-97, and this sum represents the consumption of Calcutta and the stocks in hand.

TRADE OF BENGAL PROPER (EXCLUDING CALCUTTA).

33. Ten cotton mills were worked by steam in Bengal during the past year, five being in Howrah, four in the 24-Parganas district, and one in Hooghly, but in none of them were piece-goods manufactured during the

year. Regarding the condition of the hand-loom manufacture in the interior of Bengal, the local officers report as follows:—

Burdwan Division.—"Cotton cloth is manufactured in all the districts of the Division, but it is gradually being ousted from the market by cheap Manchester fabrics. Many weavers in Burdwan are reported to have adopted other occupations, and those of Bankura have been reduced to a wretched plight. Cotton cloths of various kinds made in the Midnapore Central Jail, and a fine material of cotton cloth for mosquito curtains, manufactured at Daspur, Chandrakona, and some parts of the Tamluk Subdivision, find a rapid sale, both locally and elsewhere. Fine cotton cloths with silk, silver and gold embroideries, made at Nimtola in Midnapore, are much liked by the people of the Bombay Presidency."

Presidency Division.—"Cotton cloth is manufactured in several places in the Division, but the industry is gradually falling off in consequence of the weavers being unable to compete against European imports."

Dacca Division.—"Mill-made cloth is gradually driving the local weavers from their looms."

Chittagong Division.—"A kind of coarse cloth, called *mainamati* cloth, is manufactured close to Comilla. This kind of cloth is principally used for coats and shirts, and being cheap and durable, is largely purchased by the people of this Division."

Bhagalpur Division—Monghyr.—"Of minor manufactures of this district, there are two kinds of cheap coarse cloth which find favour with the poorer classes only."—*Purnea.*—"The country cloths manufactured in the district, which are used chiefly by the lower classes of the people on account of their durability and cheapness, are being replaced by machine-made European piece-goods."—*Sonthal Parganas.*—"Hand-woven cotton cloth is made in every part of the district, but chiefly on the east side."

Orissa Division.—"Cotton cloth is manufactured in almost all parts of the Division. The product of the local looms is preferred by the country people to machine-made cloth, because of greater durability and warmth in the cold season."

The principal districts which contributed to the increase in the imports from Bihar were Champaran (11,593 maunds, Muzaffarpur (9,446 maunds), Darbhanga (6,752 maunds), Saran (5,401 maunds), Purnea (4,820 maunds), and Monghyr (1,453 maunds). The falling off in the supplies consigned from the North-Western Provinces and Oudh was principally in the despatches from Etawah, Ghazipur, Cawnpur, Jaunpur, Bulandshahar, Aligarh, and Farakhabad,

which fell off by 3,988 maunds, 2,988 maunds, 2,478 maunds, 2,046 maunds, 2,051 maunds, 1,432 maunds, and 1,307 maunds, respectively. The decline in the exports from Bengal was due to smaller consignments from Nadia (828 maunds).

36. The bulk of the export trade was sea-borne, and its distribution during the past three years was as follows:—

The following remarks are made by the Collector of Customs regarding the sea-borne trade during the past year:—

"The exports of indigo during the past year advanced to the extent of 15·18 per cent. as compared with 1897-98, but the figures are still considerably below those of 1896-97, which were, however, above the average of the past decade, resulting in the accumulation of large stocks. These stocks appear to have now been reduced to a moderate level in England and to small proportions on the continent. Speaking generally, the increased exports were due to a heavier crop and to a reduction of stocks in the home market.

"Of the shipments to the United Kingdom, more than one-fourth was despatched direct to the consumer, the remainder being taken up by middle-men for stock. The trade with France, though showing an improvement, is still not what it used to be. The consumption of Guatemala indigo has been urged as a possible reason for the demand for the Indian dye not being greater. The trade with Germany also, in spite of an increase in the past year, still falls short of its previous proportions. This may be attributed to much of the business formerly done by German dealers being now transacted direct by consumers in other countries. The increase in the exports to Italy is attributed to an extension of the dyeing industry in that country, and also to more business being managed direct instead of, as was generally the case before, through German dealers. Russia is most choice in her selection, and always takes the finest qualities of indigo; but as a sufficiency of these was not obtainable here during the past and previous seasons, several orders found their way to Java, where a high class dye of uniform quality has of late been turned out at a moderate price. Russia has, however, taken much more Indian indigo than in 1897-98, when it took the very meagre quantity of 231 cwts. The increase in the exports to Egypt is attributed to a smaller crop in Madras, whence large shipments used to be made in previous years."

The Collector of Customs writes as follows regarding the year's crop :—

"The published forecasts of the past season's crop were not favourable. Both the area under cultivation and the outturn per acre were estimated to be considerably below the average, and that estimate seems to have been fully justified. Climatic influences further prevented the proper germination and healthy development of the plant; and, as a consequence, the crops were not only insufficient, but also unsatisfactory and of light weight and vastly inferior to the outturns of previous years. The diminution in the area cultivated with jute was due to larger areas being utilized for food-crops, to replenish stocks after the famine and in the expectation of obtaining high prices for rice—an expectation which was however, disappointed in consequence of the abundant harvest everywhere. A better jute crop is expected this year."

39. The total quantity of raw jute exported by sea during the year, as compared with the figures of the preceding two years, was as follows:—

On this subject the Commissioner of the Presidency Division quotes the following remarks made by the Managing Agents of the Shamnagar and Baranagore Jute mills.

The Managing Agent of the Shamnagar Jute Factory Company, Limited, writes as follows:—

"On the whole the trade has been fairly remunerative. The raw material in the matter of price has been at a lower average than for several years previous; while the prices obtainable for manufactured goods have been a fair average, and the margin of profit to the manufacturer has been satisfactory. Mills with one or two exceptions have paid dividends to their share-holders. Labour has been fairly plentiful until the close of the year, when a shortness was experienced chiefly amongst that class of workers from up-country, a portion of which returned to their homes. There has been no change in the standard of wages paid to the workers. As regards the health of the community in the neighbourhood of our works, there has been nothing calling for special notice, and we have suffered no special inconvenience on account of plague in Calcutta."

The Managing Agent of the Barnagore Jute Mills Company, Limited, remarks:—

"The jute crop being a very poor one, prices rose considerably, until in October an advance of about 25 per cent. had been established. Home and Continental buyers, carrying over large stocks of cheap jute from the previous season, did not support this, and a gradual decline in prices ensued, ending in a drop of about 15 per cent. to 20 per cent. from highest point.

"*Gunnies—Heavy goods.*—This year again the demand for country consumption has been but small. During the year the prices fell from 5 per cent. to 10 per cent. This has, however, been recovered at the close.

"*Hessians.*—Prices remained fairly steady throughout the greater part of the year. During the last quarter, however, rates have gradually hardened, ending in an advance of about 12½ per cent. on last year's prices.

"*Production*—(Heavy goods and Hessians) has been very considerably curtailed throughout the year. The plague scare had a most disastrous effect on labour, some of the mills in or near Calcutta being almost stopped for a time. There is still a great general scarcity of labour.

"*Profits.*—With plenty of cheap jute the year opened auspiciously, but the result of the plague scare and higher prices of jute from September onwards have entirely changed the position, and mills' profits for the past year have been but small."

In the total exports of jute gunny-bags there was a falling off of 8·5 per cent., mainly due to the short jute crop and also to the scarcity of labour in the jute mills owing to the plague scare.

GUNNY-CLOTH.

43. The total quantity of gunny-cloth imported into, and exported from, Calcutta by internal routes during the past three years, was as follows :—

SPECIFICATION OF ROUTES—	IMPORTS.			EXPORTS.

44. It has been explained in previous reports that gunny-bags and gunny-cloth are shown together in the railway returns. The foregoing figures, therefore, do not represent the actual extent of the transactions in Calcutta under this head, part of the trade in gunny-cloth having already been included under the head "gunny-bags." In the case of the trade by road and river this article is registered by pieces, while in the sea-borne trade returns it is shown in yards. For the purpose of converting pieces into yards a machine-made piece is taken as equal to 80 yards and a hand-made piece as equal to 22 yards.

45. The sea-borne trade of Calcutta under this heading during the past three years is shown below :—

46. As regards the imports by internal routes, the total trade of the past year comprised 12,317 pieces of power-loom manufacture and 51,466 hand-made pieces. The principal localities which despatched power-loom and hand-made gunny-cloth to Calcutta during the past three years were as follows :—

47. A machine-made piece being taken as equivalent to 80 yards and a hand-made piece as equal to 22 yards, the total imports, both by internal routes and by sea, amounted to 2,238,654 yards, as against 1,366,871 yards in 1897-98 and 15,39,076 yards in 1896-97.

In the exports to coast ports, Bombay showed a decline of 56·2 per cent., which may be attributed to the prevalence of plague in that Presidency. The decrease to Madras may be due to an unsatisfactory export trade. On the other hand, the advance in exports to foreign countries was general, namely, to the United Kingdom 9·3 per cent., to Germany 429·8 per cent., to South America 42·4 per cent., to the United States 9·2 per cent., and to "other countries" 49·6 per cent. The Collector of Customs, Calcutta, observes—

"Financially, the past year cannot be said to have been satisfactory to the mills, few, if any, of them having made anything like the profits they had hoped for or have averaged during the past few years."

49. In addition to the registered supplies detailed above, the consignments of power-loom gunny-cloth sent up-country direct from the neighbouring mills, without passing the Port Commissioners' wharves, but intercepted at the toll-stations on the Nadia rivers, were as follows:—

50. The number of jute-mills worked by steam in the vicinity of Calcutta during the past year was 32, as against 32 in 1897-98 and 29 in 1896-97. The quantity of jute worked up in 1898-99 was 99,82,174 maunds, as against 96,73,431 maunds in 1897-98, and 84,29,568 maunds in 1896-97. Figures are not available to show separately how much of the raw material was used in making gunny-cloth and gunny-bags. The table below shows the number of

looms and spindles at work and the aggregate quantity of raw jute consumed in the mills in each district during the past three years:—

53. By far the largest improvement was in the imports from the North-West Provinces and Oudh, and was chiefly due to the despatches from Moradabad having increased by 6,87,547 maunds, from Sitapur by 4,18,189 maunds, from Aligarh by 3,77,135 maunds, from Shahjahanpur by 3,76,251 maunds, from Bareilly by 2,99,805 maunds, from Bara Banki by 2,70,765 maunds, from Hardoi by 2,69,977 maunds, from Cawnpur by 2,45,719 maunds, from Gonda by 1,87,781 maunds, and from Baraich by 1,64,270 maunds. On the other hand, there was a falling off in the supplies from Muzaffarnagar of 2,66,683 maunds and from Meerut of 1,98,788 maunds. In the case of the supplies from Bihar, the principal fluctuations were an increase of 1,73,787 maunds from the Sonthal Parganas, 1,68,137 maunds from Bhagalpur, 1,51,914 maunds from Monghyr, 1,11,994 maunds from Patna, and 87,955 maunds from Shahabad. As regards the Bengal districts, the despatches from Nadia rose by 69,548 maunds,

from Murshidabad by 43,225 maunds, and from Hooghly by 22,089 maunds. In the exports from the Panjab, Delhi showed an increase of 31,955 maunds.

The exportation of wheat was larger than in any year since 1891-92, and was altogether exceptional as compared with the past five years. The quantity shipped to foreign ports during the year was nearly 46 times larger than in the previous year, owing to the abundant harvests of the year under review, and to the great but temporary rise in price occasioned by the short outturn of crops in the wheat growing countries. The area under wheat cultivation in Bengal and in the North-Western Provinces and Oudh, which has mainly contributed to the heavy shipments from Calcutta, was largely in excess of the previous year, while favourable rains resulted in harvests on the whole above the average. The harvest was also above the average in the Punjab.

57. The largest increase occurred in the consignments from Bengal; Nadia, the chief exporting district, showed an increase of 1,72,367 maunds on the figures for the previous year, while Faridpur, Jessore, Hooghly and Murshidabad showed an increase of 87,836 maunds, 47,682 maunds, 44,751 maunds, and 23,089 maunds, respectively. The next largest increase was in the despatches from the North-Western Provinces and Oudh, and were chiefly due to an improvement in the imports from Cawnpur of 83,750 maunds, from Allahabad of 68,066 maunds, and from Lucknow of 54,769 maunds. The falling off under the Panjab was due to smaller consignments from Delhi, viz. 49,439 maunds, as compared with the previous year.

Exports.

58. The total quantity exported by sea during the year, as compared with the figures of the preceding two years, was as follows:—

The exports of gram to foreign ports during 1898-99 increased in comparison with the previous years in consequence of better supplies, and the figures are the highest for the past six years. The shipments to Mauritius, which, as usual, took the largest quantity, advanced by 33·2 per cent. There was a falling off to Ceylon and the Straits Settlements of 10·9 per cent. and 48·8 per cent. respectively, while "Other countries" took 343·4 per cent. more.

The total imports of rice and paddy showed a decrease of 45¾ lakhs of maunds as compared with 1897-98, owing to the fact that Burma and Orissa sent smaller supplies during the year under review on account of the cessation of the famine. On the other hand, the imports from districts in Bengal Proper showed an advance of 31¼ lakhs of maunds over the trade of the past year as the result of the abundant harvest in 1898.

The export of raw hides by sea decreased by 13 per cent., the largest falling off being in the shipments to Austria-Hungary, France, Germany, and the United States. The Collector of Customs states that "the decline in the exports is attributed to the scourge of rinderpest at the Cape of Good Hope whence enormously large quantities were shipped. The exports from India had, on the other hand, been on an unprecedented scale in the preceding year in consequence of the mortality among cattle caused by the drought."

SALTPETRE.

Saltpetre is largely manufactured in the Patna Division. The Commissioner writes:—

"The manufacture continues to be under the control of the Northern India Salt Department. The table below compares the quantity of saltpetre produced in the districts noted above during the past two years:—

"There has thus been a general decrease in the outturn of saltpetre during the year as compared with the previous year, and this is attributed to two causes,—*first*, that a smaller number of refineries worked during the year, many refineries having been washed away by the heavy floods of September 1898, and the refiners being unable to re-open them; and, *secondly*, that unusually low prices ruled in the Calcutta market during the greater part of the year, so that there was no inducement to open refineries.

"Saltpetre is manufactured in small quantities in the districts of Gaya and Shahabad as well as in North Bihar."

(a) The revised figures submitted by Superintendent, Northern India Salt Revenue.

83. The destination of the export traffic by sea during the past three years was as follows:—

The decrease in the exports of saltpetre in 1897-98 was followed by a further decline in the past year of 12·1 per cent., and there are only two years in the past decade, viz., 1893-94 and 1894-95, in which the trade has been so low. The shipments to the United Kingdom during the years 1896-97 and 1897-98 were very large as compared with the two preceding years, and the exports of the year under review are not much below what they were in the earlier period.

Of the Bihar districts, the largest increase as compared with 1897-98 occurred in the despatches from Patna (6,25,301 maunds), Darbhanga (3,36,779 maunds), Muzaffarpur (2,21,155 maunds), Shahabad (1,70,993 maunds), Bhagalpur (1,64,629 maunds), Monghyr (1,47,055 maunds), and Gaya 1,36,774 maunds). The districts which contributed to the improvement noticed against the North-Western Provinces and Oudh were Bareilly, Shahjahanpur, Mirzapur, Allahabad, Baraich, Benares, Gorakhpur, Sitapur, and Jaunpur, which supplied 1,39,768 maunds, 1,07,498 maunds, 98,606 maunds, 91,044 maunds, 83,256 maunds, 74,619 maunds, 63,836 maunds, 51,828 maunds, and 51,173 maunds, respectively, in excess of the figures of 1897-98. As regards Bengal Proper, the greatest advance was in the consignments from Nadia (2,35,769 maunds), Faridpur (57,646 maunds), Murshidabad (32,535 maunds), Hooghly (28,421 maunds), and Midnapore (25,707 maunds). The increase in the case of Assam was entirely in the imports from Sylhet.

There was a large increase in the imports from the North-Western Provinces and Oudh during the past year. The districts which chiefly contributed to the increase, as compared with 1897-98, were—Aligarh (1,29,625 maunds), Allahabad (1,05,305 maunds), and Bulandshahr (1,05,174 maunds), the only district which showed a decrease (47,515 maunds) on the trade of 1897-98 being Gorakhpur. The figures under Bengal showed a considerable decrease, the largest falling off occurring in the imports from Faridpur (1,51,902 maunds), Pabna (1,07,548 maunds), Mymensingh (65,501 maunds), and Dacca (51,974 maunds). The supply imported from Bihar showed a decrease of 2,39,898 maunds, which was chiefly due to shorter consignments from the Sonthal Parganas (1,03,862 maunds), Bhagalpur (87,027 maunds), and Darbhanga (82,600 maunds). On the other hand, there was an advance in the quantities received from Patna (1,37,754 maunds). As regards Assam, the figures show a heavy falling off, the principal districts contributing to the decrease being Goalpara, Kamrup, and Sibsagar, which supplied 3,15,133 maunds, 74,176 maunds, and 41,439 maunds, respectively, less than in 1897-98. The imports from the Central Provinces, Rajputana, and Central India, and the Punjab showed a slight improvement on the trade of the previous year.

The exports of this seed by sea declined by 22·7 per cent. in the past year as compared with 1897-98. The yield in Upper India generally and in the Lower Provinces was much above the average. The exports, though showing a marked decrease as compared with 1897-98, were still largely in excess of the average of the decade.

92. The following remarks illustrative of the condition of the silk industry in the interior of Bengal during the past official year are taken from the Divisional Administration Reports:—

Burdwan Division.—In Burdwan the quantity produced is estimated at 43,810 yards, against 53,905 in 1897, the value of the outturn being Rs. 41,467, against Rs. 53,288. The industry is carried on at Mankar, Memari, Panchkoola, Jagadabad, and two other villages in the sadar subdivision, and in the villages of Bagtikari, Musthali, and Ghoranash in the Katwa subdivision.

In Birbhum the total outturn was 35,000 yards, against 43,000 yards in 1897-98. The silk filatures at Gauntia, Katasar, Bhadrapur, and Kaithi continue to work under European management. In Bankura the manufacture of mulberry silk thread and cloth is carried on to some extent in the towns of Vishnupur and Sonamukhi, and in Birsingha, a village 8 miles north of the former. Silkworms are also reared on a limited scale in some places in the south and east of the district. The quantity of silk cocoons locally obtained being small,

they are largely imported from Midnapore to meet the demand for local manufactures. Vishnupur retains its reputation of producing fine silks, which have secured the makers rewards and medals at different exhibitions in Europe. The manufacture of *kutni*, a mixture of silk and cotton, has become extinct, as the demand for it, formerly existing in the North-Western Provinces, has almost ceased. 194 maunds 20 seers 2 chitaks of silk were reeled in the three factories at Nimtola, Guruli, and Mohespur in the Ghatal subdivision of Midnapore, against 131 maunds 34 seers in 1897-58, the value estimated being Rs. 85,653, against Rs. 53,042, the total quantity of silk manufactured being 15,560 lbs., against 10,548 lbs. in 1897-98. Silk fabrics of various kinds, such as damasked silk scraps, wrappers, handkerchiefs, *saries* and *dhoties*, etc., manufactured by the native weavers of Nimtola, Ghatal, Radhanagar, and Khirpai, are exported to Calcutta, Bombay, Madras, and other places for sale.

In thana Daspur silk *dhoties* and Erandi cloth are manufactured, and find a rapid sale. These articles are also manufactured on a limited scale at Anandapur in the Sadar subdivision of the district. The silk industry in the Jahanabad subdivision of Hooghly is on the decline, and the fabrics produced by hand-looms cannot compete with the cheaper goods turned out by machinery.

Tasar is made in the Katwa subdivision from wild cocoons imported from the Sonthal Parganas and Orissa. The finished product is exported to Calcutta and thence to Madras, where it is in special request. The plague scare in Calcutta during the year is reported to have affected the trade injuriously. Tasar is manufactured at Karidha, Tantipara, and Birsinghpur in Birbhum, being woven from cocoons imported from Manbhum, Singhbhum, and the Sonthal Parganas. The industry is, however, on the wane. Tasar is also manufactured in most towns of Bankura, the chief centres of the industry being Bankura, Vishnupur, and Birsinghpur. Tasar cocoons are reared in some parts of the Khatra, the Raipur, and the Bankura thanas, but the cocoons locally obtained being inadequate for the demands of local manufacturers, they are imported in considerable quantities from the districts of the Chota Nagpur Division. There was, however, hardly any demand for the tasar cloth from outside the district, the quantities turned out and exported being therefore very limited. Tasar fabrics are most extensively manufactured at Khirpai and Anandapur in the Sadar subdivision of Midnapore, and are also produced in the Jahanabad subdivision of Hooghly, but the industry is languishing.

Presidency Division.—The silk industry is chiefly carried on in the districts of the 24-Parganas and Murshidabad. The following table compares the state of this industry during the last three years:—

Districts.	Number of factories.			Produce.			Value.			Remarks
	1896-97.	1897-98.	1898-99.	1896-97.	1897-98.	1898-99.	1896-97.	1897-98.	1898-99.

As noticed in the previous year's report, the manufacture of silk cloth at Mirzapur, in the district of Murshidabad, is gradually on the decline. The number of pieces of silk cloth manufactured during the year under report was 5,032, valued at Rs. 44,916, against 6,052 pieces, valued at Rs. 45,396 of the preceding year.

Rajshahi Division.—The yield of silk was 155,452 lbs., against 135,831 lbs. in the previous year. This is inclusive of the Servil Factory, the statistics of which have been furnished this year. Endi-cloth, a coarse silk, is manufactured in small quantities for home consumption in Dinajpur, Jalpaiguri, Rangpur, and Bogra.

Bhagalpur Division.—The manufacture of *tasar* and *bafta* cloths, which at one time was a very thriving industry, is at present confined to a few families within the Municipality of Bhagalpur, with whom it constitutes the sole means of subsistence.

Malda.—Besides the two European silk factories there are numerous native silk filatures in different parts of the district. The two European factories produced 37,615 lbs. of silk of the estimated value of Rs. 2,73,736, against 47,202 lbs. of the estimated value of Rs. 3,03,233 in the preceding year. The estimated value of the silk produced in the native filatures was Rs. 10,00,000, against Rs. 9,00,000 in the year before. The estimated value of the silk piece-goods manufactured by the natives was Rs. 40,000, against Rs. 30,000 in the preceding year.

Chota Nagpur Division.—Regarding the local native manufactures, I have nothing to add to the information given in paragraph 51 of last year's report beyond noting that there has apparently been a slight revival in the industry of weaving tusser cloths amongst the *tantis* of Raghunathpur and Singbazar, in the Manbhum district, the total outturn being reported at 48,000 yards of cloth as compared with 36,000 yards during the preceding year. I may here mention that during my tour in the Native States I found native looms in many of the villages, the cloth in common use by the lower classes there being almost entirely of local make."

93. The sea-borne exports from Calcutta during the past year, as compared with the figures of the two previous years, were distributed as follows:—

The trade with the United Kingdom fell by 26·4 per cent., while France and Italy took 25·1 per cent. and 32·1 per cent. more than in 1897-98. The quantity exported to "other countries" also increased by 268·3 per cent.

The imports of refined sugar have decreased by 6·9 per cent. during the past year, as compared with 1897-98, when they took a sudden great advance forward to a figure more than double the previous year. The decreases have been from the United Kingdom, Germany, China, Straits Settlements, and other countries. There have, on the other hand, been notable increases from Austria-Hungary, Mauritius, and Java. The importations from Mauritius have fluctuated greatly from year to year during the past three years. During the year under report the increase has been 22·4 per cent., as compared with 1897-98.

97. The principal districts from which the bulk of the sugar supply was derived during the past three years, will be seen from the following table:—

The following accounts of the sugar industry in Bengal are extracted from the Divisional Administration Reports for the past year:—

Sugar.

Burdwan Division.—The manufacture of molasses from sugarcane is carried on in all districts of the Division, but that from the juice of the date palm is produced mostly in the districts of Burdwan, Hooghly, and Howrah. Sugar is manufactured from cane molasses at Raipur and Kakhutia in Birbhum, but the production and consumption of this article declined in consequence of the cheapness of imported sugar of a superior quality. Molasses are largely manufactured in the Ulubaria subdivision and also in Midnapore, where the total quantity produced is estimated at 5,12,400 maunds, against 5,52,000 in 1897-98.

Presidency Division.—Sugar is still manufactured from sugarcane and date-juice by primitive native process in the subdivisions of Basirhat and Barasat in the district of the 24-Parganas. In Nadia sugarcane is largely cultivated in the Kushtia subdivision and in part of Chuadanga. In the Kushtia subdivision the sugarcane-crushing mill factory worked throughout the year, but information regarding this is not available. It is, however, known that the machines are distributed to local agents, who let them out on hire at a rupee or so a day. The principal centres of the date sugar industry in this district are Santipur, Chakdaha, Kishanganj, Daulatganj, Alamdanga, and Moheshganj, but no statistics are available. The refined sugar manufactories in the district of Jessore did not work during the year under report. This industry has been steadily declining owing to the fall of market caused by the importation of foreign sugar. But it is hoped that the new countervailing duties imposed on bounty-fed sugar imported into the country will facilitate the production of home-made sugar."

Exports.

(a) Revised figures.

"In Jalpaiguri only three applications for lands under tea-lease rules were received, against 13 in the preceding year. The outturn of tea shows an increase. The average yield per acre of mature plants was 484·2 lbs., as compared with 516·6 lbs. in the previous year. The cause of this falling off has been attributed partly to the conversion of a large area of land under immature plants yielding leaf, but not accounted for, into the area under mature plants, and partly to the fall of the estimated outturn in consequence of unfavourable weather during the year."

"*Chota Nagpur Division.*—There are altogether 26 tea-gardens, viz., 5 in Hazaribagh and 21 in Ranchi. In Hazaribagh returns were received from four gardens, and the total quantity of tea manufactured in them aggregated 49,680 lbs., against 36,200 lbs. in the preceding year. In Ranchi returns were received from 20 of the gardens, the total quantity of tea manufactured in which aggregated 1,009,190 lbs., against 931,695½ lbs. in the preceding year. Writing on the condition of the tea cultivation in this district, Mr. Streatfeild, the Deputy Commissioner, remarks:—

'The weather during the year was not very favourable for tea cultivation, and the long drought in the spring resulted in the crop being a short one; prices ruled low as usual, though the Palandu tea-garden had an unusually good sale.'

"I very much fear, however, that for the reasons noticed in last year's report the prospects of the tea industry in Chota Nagpur are not hopeful."

"*Chittagong Division.*—In Chittagong tea is manufactured. During the year under report 2,233,389 lbs of tea were manufactured in twenty gardens, against 2,126,028 lbs manufactured in seventeen gardens in the preceding year."

The exports of tea to foreign ports increased by over four million pounds, or 2·8 per cent., owing to larger shipments to all the importing countries except Australia, Cape Colony, and the Straits. The production of the last year was the largest on record. The majority of the teas of the past year have been of common grades; and the average price stood at 8 annas 1 pie per lb. for the year, against 8 annas 5 pies per lb. in 1897-98. The price per lb. has now gone back to the average of the five years preceding the great rise of 1894-95. The growth of the consumption of Ceylon tea in the United Kingdom was suddenly checked in the past year.

The exports to foreign ports showed a decline of 25·9 per cent. in comparison with 1897-98. The Collector of Customs, Calcutta, writes as follows, regarding the exports of unmanufactured tobacco:—

"The principal fall was to Holland, amounting to 30·7 per cent. To the United Kingdom there was a shipment of 22,400 lbs.* against nothing in the previous year, whilst after two blank years France received a shipment of 19,742 lbs. A curious feature is noticeable in connection with the trade with Belgium. That country received nothing during the three years preceding 1897-98, when it took no less than 26,485 lbs. and now another blank year has to be reported. No doubt the importation of 1897-98 was really for France, which took nothing in that year direct from India. To Mauritius and other countries the shipments increased by 10 per cent. and 34·2 per cent. respectively. To coast ports there was a decline of 1·7 per cent. in the shipments under the head.

4. *Cotton, raw.*—The falling-off in the trade in raw cotton was owing to the crop in the Chittagong Hill Tracts not being good.

5. *Jute, raw.*—The Chittagong port, like Calcutta, suffered from the effects of a small jute crop, and exports therefrom to foreign ports declined considerably during the past year, as will be seen from table appended:—

6. *Rice and paddy.*—The very large increase in the import and export trade under this head was the result of the good harvests reaped in the past year, succeeding two years of scarcity. The quantities imported into the

Chittagong port by country boats during 1898-99 are compared below with the figures for the two previous years:—

	Rice.			Paddy.

GRAND TOTAL ...	17,426	81,564	2,29,582	99,565	1,07,042	15,15,216

The amount of rice imported by coasting vessels was 5,69,006 maunds, as against 5,34,394 maunds in 1897-98 and 79,041 maunds in 1896-97, and that of paddy 66,599 maunds, as against 65,361 maunds and 1,20,317 maunds in the preceding two years, respectively.

The total quantity of rice exported to foreign countries during the past year is shown below, as compared with the figures for the preceding two years:—

		1896-97.	1897-98.	1898-99.
Rice	Cwts.	22,748	34,968	107,271
	Mds.	30,962	47,645	1,46,008
Paddy	Cwts.	...	5,015	...
	Mds.	...	6,826	...

The increase was due chiefly to larger shipments to Trinidad, Mauritius and Rio-de-Janeiro.

According to the coasting trade returns, the quantities of rice and paddy shipped for different coast ports in India during the past three years, were as follows:—

		1896-97.	1897-98.	1898-99.
Rice	Cwts.	22,202	43,098	117,757
	Mds.	30,219	58-661	1,60,281
Paddy	Cwts.	5,702	20,961	99,027
	Mds.	7,761	28,530	1,31,788

The increase was more pronounced in the exports to the Madras ports, the figures for the past year being nearly five times greater than those of 1897-98, although they were still far behind the exportation of the two years preceding 1896-97.

7. The exports of salt from Chittagong by country boats during the past three years were distributed thus:—

Salt.

Destination.			1896-97.	1897-98.	1898-99.
			Mds.	Mds.	Mds.
To Chittagong	...	...	2,89,666	1,33,895	1,16,347

„ Dacca (Narayanganj)	...	...	...	2,920	1,660
„ Other districts	...	...	6,850	3,205	1,820
	Total	...	3,02,605	1,44,466	1,27,027

Besides these supplies, the quantity of salt shipped for Narayanganj by sea-going vessels was 1,49,150 maunds, as against 99,633 maunds in 1897-98 and 5,426 maunds in 1896-97. The Collector of Sea Customs, Calcutta, has made the following remarks regarding the salt trade of Chittagong during 1898-99:—

"There was a heavy falling-off of 49·4 per cent. in the quantity of salt imported into Chittagong from foreign ports, while from Indian ports importations ceased altogether. The decrease is a natural consequence of the abnormally large importations of the preceding year. Only Liverpool Panga salt was received during the year. There was a substantial rise of Rs. 1,38,814 in the revenue collected on salt. This is attributed by the Collector of Customs at Chittagong to increased clearances by rail for Narayanganj, Noakhali and Tippera, railway communication being more convenient and less expensive than the former means of transport."
